

POSITIVE CASES (ISOLATION)

# Isolation: People who test positive

I test positive for COVID-19 regardless of my vaccination status (I may be unvaccinated, I may have received my first vaccine(s), or have received my booster vaccine)

I have no symptoms

I have symptoms

See other side for positive with no symptoms tree.

I will wear a well-fitting mask at work, in public places, etc. and I **can** isolate completely separately from household members\*

I will wear a well-fitting mask at work, in public places, etc. but I **cannot** isolate completely separately from all household members\*.

I **cannot** wear a well-fitting mask at work, in public places, etc. regardless of whether or not I can isolate completely separately from all household members\*.

Stay home and isolate for 10 days from symptom start date.

Isolation may end on day 11 IF:

- You are fever free for at least the last 24 hours without the use of fever reducing medications AND
- Other symptoms are improving

If you can wear a well-fitting mask around others (at home, at work, in public places, etc.) If so, you may leave home on day 6 AND wear a well-fitting mask until day 11.

- Antigen testing is recommended on day 5. If you test positive again on day 5, continue isolating through day 10 OR test daily on days 6-10. If test result is negative between days 6-10, end isolation but continue to wear a well-fitting mask. Follow all Washington State mask requirements after day 10.

Stay home and isolate for 10 days from symptom start date.

Isolation may end on day 11 IF:

- You are fever free for at least the last 24 hours without the use of fever reducing medications AND
- Other symptoms are improving

If you can wear a well-fitting mask around others (at home, at work, in public places, etc.) If so, you may leave home on day 6 AND wear a well-fitting mask until day 11.

- Antigen testing is recommended on day 5. If you test positive again on day 5, continue isolating through day 10 OR test daily on days 6-10. If test result is negative between days 6-10, end isolation but continue to wear a well-fitting mask. Follow all Washington State mask requirements after day 10.

Stay home and isolate for 10 days from symptom start date. Follow all Washington State mask requirements after day 10.

To leave isolation on day 11:

- You must be fever free for at least the last 24 hours AND
- Other symptoms are improving.

\*If you can isolate completely separately from all household members (i.e. not sharing living spaces like bedroom, bathroom, kitchen, etc.), the 5-10 day quarantine period for household members will begin on the last day you had contact with them. If you cannot isolate completely separately, any household members who do not test positive for COVID-19 will quarantine throughout your isolation period AND their additional 5-10 days isolation since they will have contact with you throughout your isolation period (i.e. contagious period). See Close Contact trees for more clarity.

# Isolation: People who test positive

I **test positive** for COVID-19 **regardless of my vaccination status** (I may be unvaccinated, I may have received my first vaccine(s), or have received my booster vaccine)

I have no **symptoms**

I have **symptoms**

I **will** wear a well-fitting mask at home around household members, at work, in public places, etc.

I **will** wear a well-fitting mask at work, in public places, etc. but **not** at home around household members.

I **cannot** wear a well-fitting mask at home around household members, at work, in public places, etc.

See other side for positive and symptomatic tree.

Stay home and isolate for 5 days from positive test date.

Stay home and isolate for 10 days from positive test date.

I do not develop symptoms during my 5 day isolation

I develop symptoms during my 5 day isolation

I do not develop symptoms during my 10 day isolation

I develop symptoms during my 10 day isolation

You may leave isolation on day 6 IF:

- Days 6-10 you continue to wear a well-fitting mask around household members, at work, in public places, etc. Follow all Washington State mask requirements after day 10.

Antigen testing is recommended on day 5. If you test positive again, continue isolating through day 10 OR test daily on days 6-10. If test result is negative between days 6-10, end isolation but continue to wear a well-fitting mask. Follow all Washington State mask requirements after day 10.

Restart 5 day isolation with day 1 being the day that symptoms began.

Isolation may end on day 6 after symptom onset IF:

- You are fever free for at least the last 24 hours without the use of fever reducing medications AND
- Other symptoms are improving AND
- Days 6-10 after symptom onset you continue to wear a well-fitting mask around household members, at work, in public places, etc. Follow all Washington State mask requirements after day 10.

Antigen testing is recommended on day 5. If you test positive again, continue isolating through day 10 OR test daily on days 6-10. If test result is negative between days 6-10, end isolation but continue to wear a well-fitting mask. Follow all Washington State mask requirements after day 10.

Leave isolation on day 11. Continue following Washington State mask requirements after day 10.

Restart 10 day isolation with day 1 being the day that symptoms began. Continue following Washington State mask requirements after day 10.

To leave isolation on day 11 after symptom onset:

- You must be fever free for at least the last 24 hours without the use of fever reducing medications AND
- Other symptoms are improving.

# CLOSE CONTACTS (QUARANTINE)

**These decision trees apply whether:**

- The close contact was exposed to COVID-19 while at camp, or
- The close contact was exposed prior to camp and learns of that close contact while at camp

# Quarantine: Close Contact who is unvaccinated

I'm a **close contact** to (but do not live with) someone who tested positive for COVID-19 and I am **not vaccinated**

Quarantine for 10 days from last exposure\*. On day 5, seek testing. If symptoms begin at any point during quarantine, seek testing as soon as possible and refer to the "I have symptoms" branch of the Isolation Tree.

Isolate and seek testing as soon as possible.

Remain without symptoms and test negative

Remain without symptoms but test positive

Test negative

Test positive or choose not to test

Watch for symptoms and continue quarantining for 10 days UNLESS:

You can wear a well-fitting mask around others (at home, at work, in public places, etc.) If so, you may leave home on day 6 AND wear a well-fitting mask until day 11.

Continue following Washington State mask requirements after day 10.

Follow the "I have no symptoms" branch of the Isolation Tree

Watch for symptoms and continue quarantining for 10 days UNLESS:

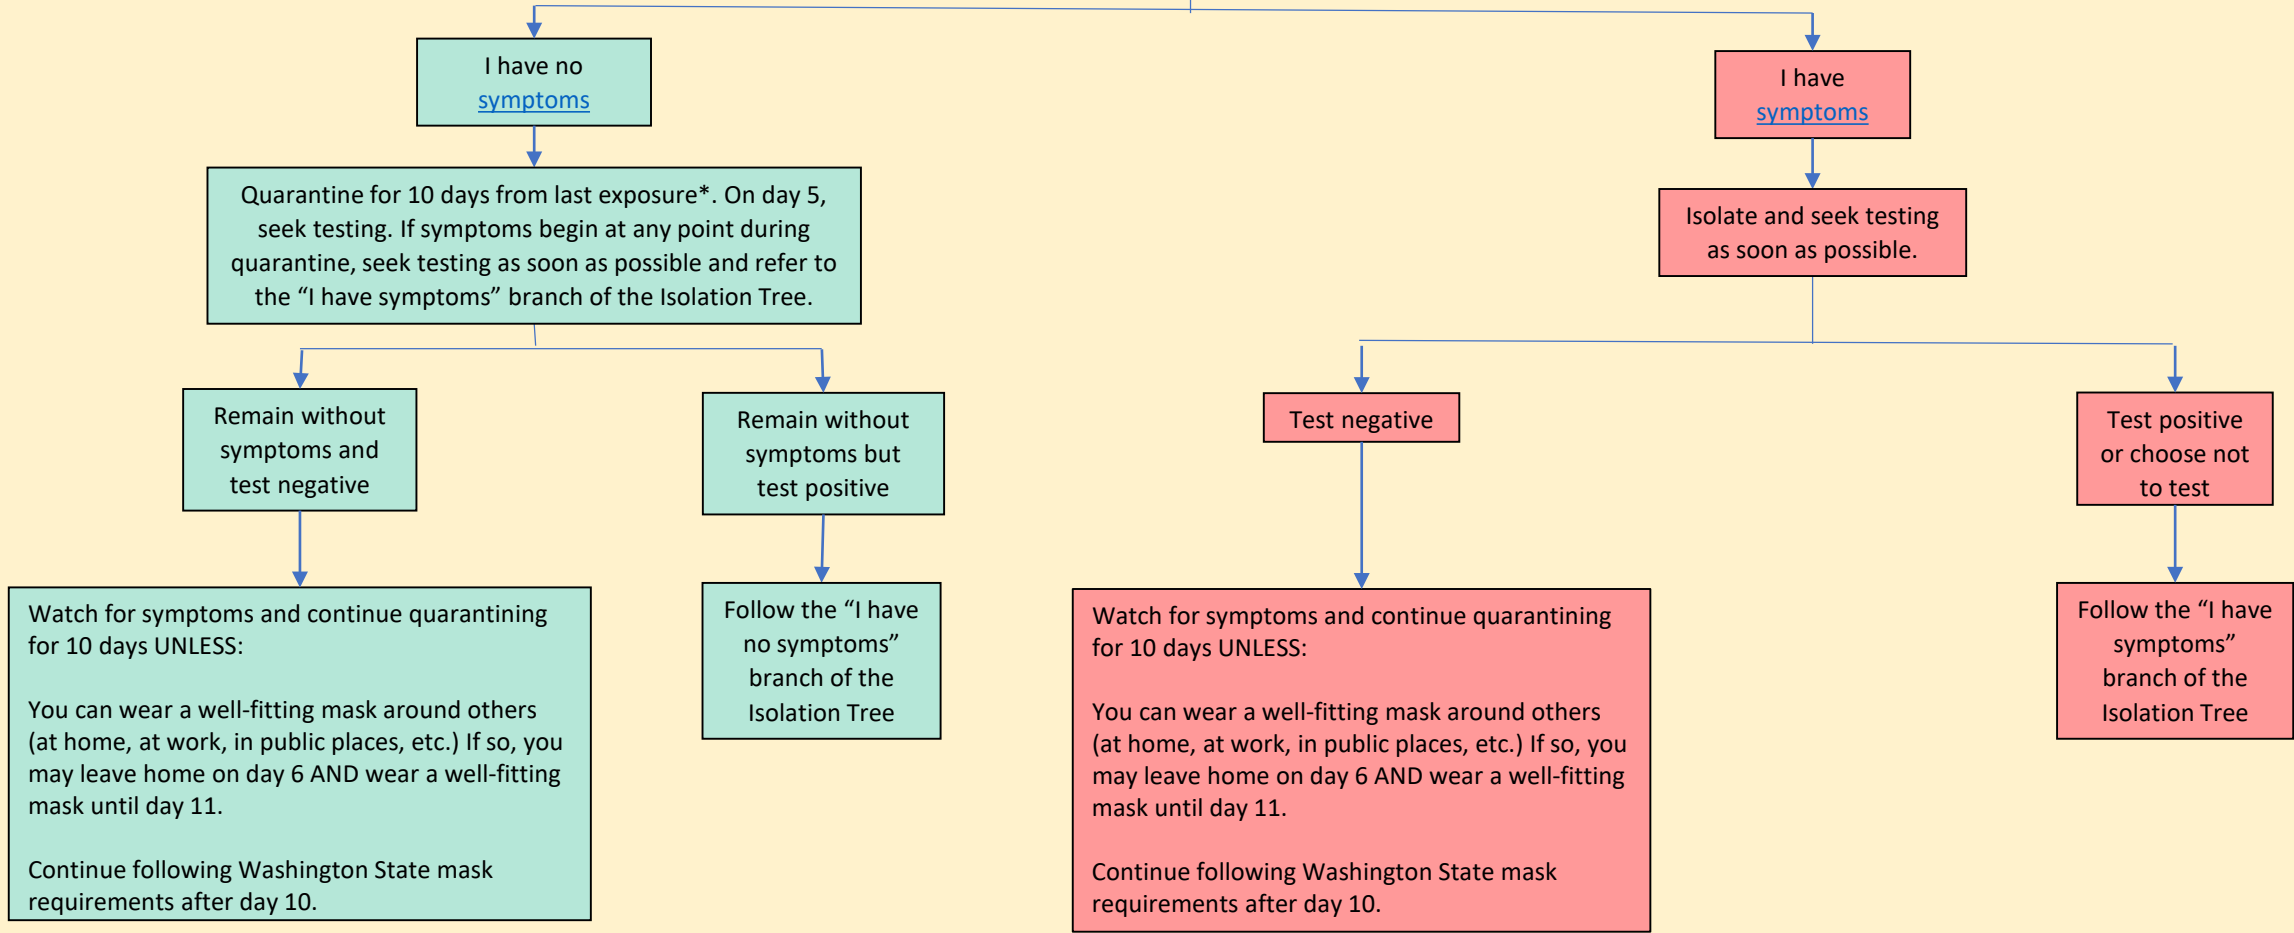

You can wear a well-fitting mask around others (at home, at work, in public places, etc.) If so, you may leave home on day 6 AND wear a well-fitting mask until day 11.

Continue following Washington State mask requirements after day 10.

Follow the "I have symptoms" branch of the Isolation Tree

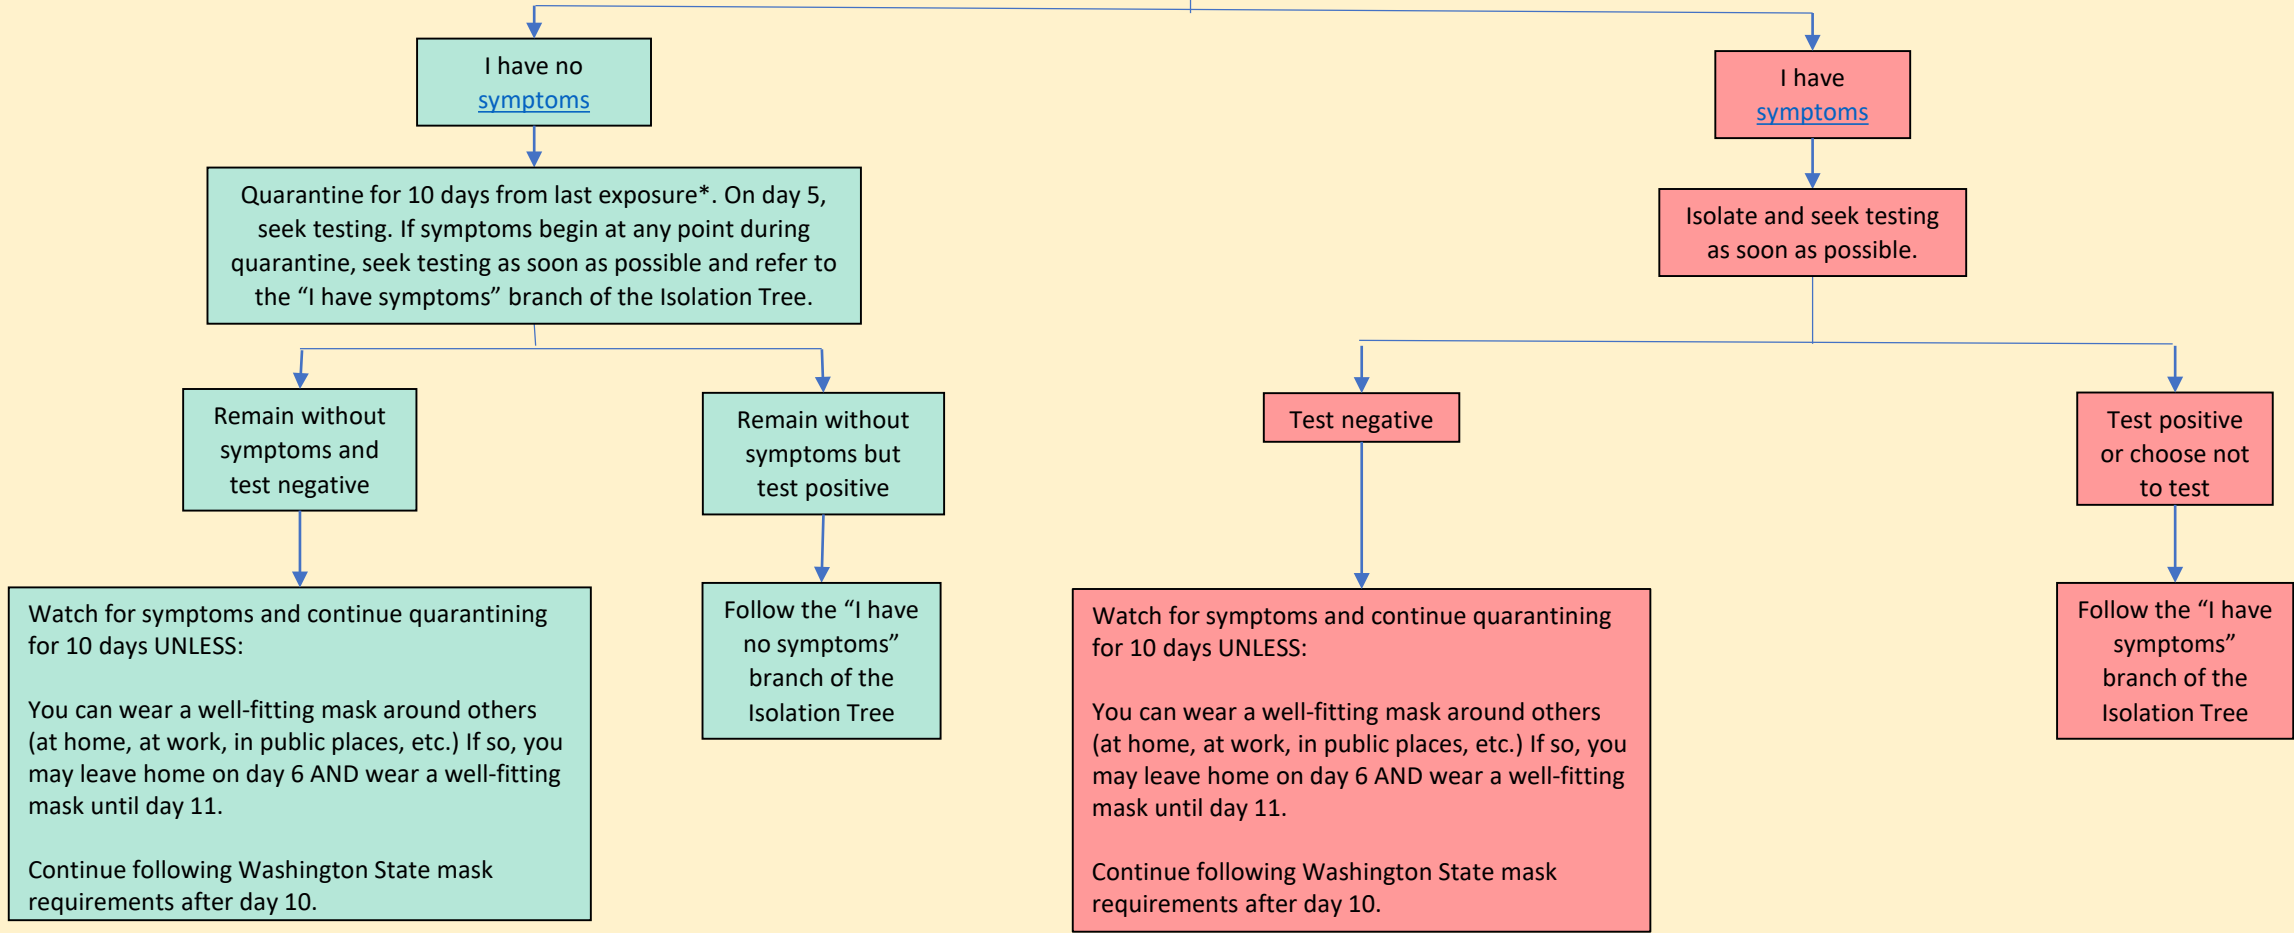

# Quarantine: Close Contact who is unvaccinated

I'm a **close contact** to (but do not live with) someone who tested positive for COVID-19 and I received my second dose of Pfizer or Moderna more than 6 months ago and I do not have my booster vaccine yet

# Quarantine: Close Contact who is unvaccinated

I'm a **close contact** to (but do not live with) someone who tested positive for COVID-19 and I received my dose of Johnson & Johnson more than 2 months ago and I do not have my booster vaccine yet

# Quarantine: Close Contact with booster or confirmed COVID-19 in last 90 days

I'm a **close contact** to (but do not live with) someone who tested positive for COVID-19 and I have received my booster dose or I had **CONFIRMED COVID-19 within the last 90 days.**

I have no symptoms

I have symptoms

May continue as normal while wearing a well-fitting mask for 10 days and monitor for symptoms. If possible limit interactions with others. Seek testing at least 5 days after your day of last exposure\*. After day 10, continue to wear a mask as required in Washington State. If you develop symptoms, seek testing as soon as possible and follow the right side of this tree.

Isolate for 5 days from when symptoms began and seek testing

Test negative or choose not to test

Test positive

Test negative

Test positive or choose not to test

Continue monitoring for symptoms and wearing a well-fitting mask until day 11.

Follow the "I have no symptoms" branch of the Isolation Tree.

Stay home until symptoms have improved and you haven't had a fever for at least 24 hours. Wear a well-fitting mask until day 11.

Follow the "I have symptoms" branch of the Isolation Tree.
